### WORLD MALARIA DAY

**Epalinges, Switzerland, April 25, 2019** – Mymetics Corporation (OTCQB: MYMX), a pioneer and leader in the research and development of virosome-based vaccines against life threatening and life disabling human diseases has learned that there is inaccurate information in the public domain.

Mymetics is dedicated to develop vaccines for life threatening and disabling diseases based on our virosome virus like particle platform.

One of the important efforts by Mymetics is the aim to develop a safe and highly efficacious vaccine which is cold chain independent and can address all the stages of the plasmodium falciparum parasite.

Mymetics can only do this through its multiple partnerships with academic institutions and NGOs, like the Swiss Public Health and Tropical Institute, University of Basel, University of Lausanne, University of Oxford, the European Vaccine Initiative, the Laboratory for Malaria Immunology and Vaccinology (LMIV), the NIH and PATH-MVI to name a few.

The current status is the development of a tetra-valent (containing four malaria antigens) virosome based vaccine that addresses the blood and liver stage of the *pf* parasite. These formulations are being tested in well know pre-clinical animal models and results are expected later in 2019.

For World Malaria Day, we recently worked with Mediaplanet UK on the 2019 Fight against Malaria Campaign. A printed publication was enclosed within every copy of The Guardian newspaper and the content available online also at [www.fightagainstmalaria.com](http://www.fightagainstmalaria.com).

Read exclusive content from key thought leaders and learn more about the importance of stepping up commitment and investment to end malaria.

#### Forward looking statements

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for forward-looking statements, which are identified by the words "believe," "expect," "anticipate," "intend," "plan" and similar expressions. The statements contained herein which are not based on historical facts are forward-looking statements that involve known and unknown risks and uncertainties that could significantly affect our actual results, performance or achievements in the future and, accordingly, such actual results, performance or achievements may materially differ from those expressed or implied in any forward looking statements made by or on our behalf. These risks and uncertainties include, but are not limited to, risks associated with our ability to successfully develop and protect our intellectual property, our ability to raise additional capital to fund future operations and compliance with applicable laws and changes in such laws and the administration of such laws. See Mymetics' most recent Form 10-K for a discussion of such risks, uncertainties and other factors. Readers are cautioned not to place undue reliance on these forward- looking statements which speak only as of the date the statements were made.
